

Jabra Busylight

Avoid interruptions in calls

Increase your productivity by keeping your concentration on every call. Let people know you're on a call so you can avoid interruptions.

Designed for open office environments

The Jabra Busylight helps you cope with the challenges of an open office environment by clearly letting people know when you're on the phone. The indicator turns red when you're on a call and stops you from being needlessly interrupted.

Ease of use

With its domed shape light guide, Jabra Busylight is visible from all angles. A long cord allows you to place the light where it easily can be seen and there is no need for an external power supply. Mount the Jabra Busylight onto your desk or PC monitor and adjust horizontally or vertically by using its 180° turntable foot with double adhesive tape.

Reasons to choose

Jabra Busylight

- Avoid disturbance in calls with visible red indicator
- Increase call productivity
- Hassle-free installation and ease of use

Works with desk phone, softphone, and smartphone¹
